## Profile

I'm specializing in Artificial Intelligence and Machine Learning and love working on real projects that help me learn new technologies. I enjoy full-stack development challenges because they improve my problem-solving and coding skills. My hands-on experience in AI and ML helps me understand how things work in real life. All these experiences are helping me build strong skills for a successful career in tech.

## Education

### SAHYADRI COLLEGE OF ENGINEERING & MANAGEMENT

Bachelor of Engineering in Computer Science-AIML (CGPA: 9.44/10.0)

Mangaluru, KA

Nov 2022 – Expected 2026

## Experience

### BRANDANDBRANDZ

Full Stack Developer Intern

Bangalore, KA

Jan 2026 – Present

- Worked on Full-Stack and SaaS applications using ReactJS, Node.js, FastAPI and PostgreSQL, building responsive UIs, backend APIs, authentication and database systems. Developed projects including a Celebration Platform, Temple Website and Lead Generation SaaS product with CRM integration, deployment and performance optimization.

**Tech:** ReactJS, Node.js, Express.js, FastAPI, MongoDB, MySQL, PostgreSQL, HTML, CSS, JavaScript, Bootstrap, Git, Python, UI/UX Design

## Projects

### Real-time Interaction ChatBot

GitHub

- Developed an AI-powered Full-Stack Chatbot integrating machine learning-based intent recognition and Large Language Models (LLMs) for human-like conversations, using a Flask backend and responsive frontend with HTML, CSS and JavaScript for seamless user interaction.

**Tech:** Flask, HTML, CSS, JavaScript, Large Language Models (LLMs), Full-Stack Development

### Real-Time Voice Translation System

GitHub

- Developed a real-time AI-powered speech-to-speech translation system by integrating Speech Recognition, Machine Translation and Text-to-Speech into a scalable Python backend with CLI and web-based multilingual communication support.

**Tech:** Python, SpeechRecognition API, Google Translate API, gTTS, Flask.

### AI-Enhanced Diagnostic Tool for Youth Depression Recovery

GitHub

- Developed an AI-powered diagnostic tool combining CNN, Naive Bayes and Random Forest to detect youth depression early using facial, text and wearable data with BDI-based scoring and preprocessing.

**Tech:** OpenCV, Haar Cascade, Pickle, CSV, Scikit-learn, Pandas, REST API, Django, TensorFlow, NumPy

## Skills & Technology

**Languages:** Python, HTML, CSS, JavaScript, C, SQL

**Frameworks/Libraries:** React, Node.js, TensorFlow, Keras, scikit-learn, NumPy, Pandas, SciPy, OpenCV.

**Databases/Platforms:** MySQL, MongoDB, Firebase, AWS

**Tools:** Git, GitHub, VS Code, Google Colab, Docker, REST APIs

**Soft Skills:** Communication, Teamwork, Time Management, Problem Solving

## Leadership & Volunteering

- **Internship Mentor Coding Key :** Guided interns through project planning, code reviews and iterative feedback to improve learning outcomes.
- **Smart India Hackathon (SIH) 2024 Volunteer :** Supported event logistics and coordination with participating teams and mentors for smooth national-level execution.
